

Google Calendar handoff

Jade Zhao · handoff sheet · Last checked: October 2026

For the person who will create events and share a calendar after the builder leaves.

Why tickets happen

Tickets pile up when events stay private on the wrong Google account, or when sharing is never turned on.

Steps

- 1 Open calendar.google.com and sign in with the Google account that owns the calendar.
- 2 To create an event, click Create (or click an empty time slot). Add a title, date, and time, then Save.
- 3 Optional: add guests by email if they need an invite.
- 4 To share a whole calendar, find it under My calendars. Open the three dots, then Settings and sharing.
- 5 Under Shared with, add a person by email and choose what they can see. Send.

Write this down

- The Google account that owns the calendar.
- The calendar name under My calendars.
- Who should see details vs free/busy only.
- Never put the password on this sheet.
