about (paste-ready)

Most of my engineering work runs through **ServeIT Clinic** at IU Luddy: real nonprofits, real deadlines, real users who are not technical.

ServeIT is where I lead accessible website builds (WCAG 2.1), Python/PostgreSQL data pipelines, and partner handoffs that still work after the semester ends. **ServeAI** is ServeIT's public-interest AI track (PIT-UN): responsible generative AI tools and guides so community organizations can adopt AI without breaking trust or accessibility.

That is the work I want more of: software that helps people who did not ask for a developer on retainer.

I also coordinate FASE MAP, support 50+ students as a UTA, and represent IU as a student ambassador. Summer 2026 I did GTM engineering at an aspiring full-stack SWE startup in NYC; the company got acquired during my internship, which taught me a lot about handoffs under pressure.

May 2027 · Informatics @ IU Luddy. Targeting software engineering and accessible product roles. Open to Southern California, remote US, and NYC hybrid.

experience · serveit (lead this one)

Website Team Lead · ServeIT Clinic · Indiana University Luddy · Jan 2024 – Present

Lead nonprofit web delivery at IU Luddy's tech clinic. WCAG 2.1 builds, Python/PostgreSQL ETL, partner scoping, and maintainable handoffs. ServeAI: public-interest AI tooling and guides for community partners (PIT-UN track).

Skills: Python · React · WCAG · PostgreSQL · Technical Documentation
