problem → motion → artifact

how to read this

for each lane: problem in plain language, motion you actually ran, artifact someone else can open. numbers when you have them. no deal-room theater.

01 · serveit clinic · iu luddy

problem. nonprofits need sites staff can update without a developer on call.

motion. website team lead since jan 2024. wcag 2.1 builds. engagement tools for community partners.

python/postgresql etl. serveai (pit-un): public-interest ai guides for partners.

artifact. live nonprofit sites + maintainable handoffs.

02 · fase map · student life · uta

problem. first-years and mentors need clearer day-to-day ops than a one-off workshop.

motion. mostly mentor training, canvas ops, and emails. uta for 50+ students. campus leadership programming with student life partners.

artifact. canvas content, mentor training materials, matchaxmoxie teaching site.

03 · early-stage startup (nyc)

problem. b2b clients need working pilots, not just slides.

motion. jun–jul 2026, hybrid nyc. software engineering intern at an early-stage startup. scoped asks from customer calls, demo envs / poc sandboxes, python for onboarding automation. company acquired during internship.

artifact. handoff docs + client tooling from pilot to production.
