

Apple Notes handoff

Jade Zhao · handoff sheet · Last checked: October 2026

For the person who will open, write, and find notes on iPhone or iPad after the builder leaves.

Before you start

Use only an account you have permission to use. If you do not know which account to use, or cannot sign in, stop and ask the named account owner. Never share or write down a password or sign-in code.

Why this matters

Notes can be hard to find if they are saved under a different Apple Account or folder.

Steps to follow

- 1 Open the Notes app on the iPhone (or iPad).
- 2 Tap a folder, then tap a note in the list to open it.
- 3 To make a new note, tap the compose button (pencil in a square), type, then tap Done.
- 4 To find a note, pull down on the list for Search, then type a word from the note.
- 5 To pin a note, swipe right on it and tap Pin.
- 6 To share, open the note, tap the share icon, then choose how to send a copy or invite someone.

If the screen looks different, stop before changing settings. Use the official help link below or ask the account owner for help.

Write this down

- Which Apple ID / device holds the notes.
- Which folder the day-to-day notes live in.
- Who to ask if iCloud Notes will not sync.
- Never put the password on this sheet.
