

Canva handoff

Jade Zhao · handoff sheet · Last checked: October 2026

For the person who will make a simple post or flyer in Canva after the builder leaves.

Before you start

Use only an account you have permission to use. If you do not know which account to use, or cannot sign in, stop and ask the named account owner. Never share or write down a password or sign-in code.

Why this matters

A design is not ready to use until it is downloaded or shared with the right person.

Steps to follow

- 1 Open canva.com and sign in with the account that owns the designs.
- 2 Click Create a design. Search for Instagram post or Flyer, then open a size that fits.
- 3 Pick a template, or start blank. Click text to edit. Click a picture to replace it.
- 4 When it looks right, click Share, then Download. PNG for posts. PDF for a printable flyer.
- 5 To send the design, use Share and invite them, or download the file and send the download.

If the screen looks different, stop before changing settings. Use the official help link below or ask the account owner for help.

Write this down

- The Canva account email that owns the brand folder.
- Where finished downloads should be saved.
- Who posts the finished file.
- Never put the password on this sheet.
