

Google Drive handoff

Jade Zhao · handoff sheet · Last checked: October 2026

For the person who will find files, share links, and check access after the builder leaves.

Before you start

Use only an account you have permission to use. If you do not know which account to use, or cannot sign in, stop and ask the named account owner. Never share or write down a password or sign-in code.

Why this matters

Files can be hard to find when they are in a different Google Account. Viewer access is safer when someone only needs to look.

Steps to follow

- 1 Open drive.google.com and sign in with the same Google account that owns the files.
- 2 To find a file, use the search box at the top, then open the result.
- 3 To share, right-click the file (or select it and click Share). Add an email, or choose Copy link.
- 4 Check the role: Viewer, Commenter, or Editor. Viewer is enough for most handoffs.
- 5 Open Share again later to see who has access. Remove someone if they should not keep the file.

If the screen looks different, stop before changing settings. Use the official help link below or ask the account owner for help.

Write this down

- The Google account that owns the Drive files.
- Where the main folder lives (name or Shared drive).
- Who should stay as Editor vs Viewer.
- Never put the password on this sheet.
